(a) truncation threshold, both forms
beam_cf, strong
beam_cf, weak
beam_ff, strong
beam_ff, weak
bar_fx, strong
bar_fx, weak
max. error (%)
truncation threshold rcond
(b) Gram conditioning (1D)
$1/\epsilon_{mach}$
Bernstein
Legendre
cond(Gram matrix)
N_ϕ
(c) cantilever beam, plain vs truncated solve
Eig-PIELM, plain
Eig-PIELM, truncation
Weak, plain
Weak, truncation
Weak Legendre, plain
max. error (%)
N_ϕ
