(a) accuracy
max. eigenfrequency error, 5 modes (%)
Weak Galerkin (1 solve)
Eig-PIELM + Brent iteration
Eig-PIELM, single pass ($\lambda^* = 0$)
H1
H2
H3
H4
(b) cost, first 5 modes
wall time (ms)
79 solves
92 solves
111 solves
110 solves
1 solve
(c) cost vs modes (H2; numbers = solves)
time (ms)
weak (one solve)
Eig-PIELM + Brent iteration
number of requested modes
